Dear Intern Hiring Manager,

I recently stumbled across your Engineering Apprentice program and would be thrilled to be considered for a position within the organization. I am aspiring to become a better developer tomorrow. I began my journey coding when I was still in elementary school. I have worked professionally on projects over the years such as personal and commercial websites. I am very proficient with ECMAScript 6 and am finally moving on to learn React and Node.js. Please consider me for this role because I know that my dedication would be a lifelong payoff for all parties involved.

Sincerely,

Mikey Nichols
